

WHERE IS MY MONEY GOING?

Spend Analysis

Aug 2025 – Jul 2026

A transaction-level review of every statement ingested. All figures computed on this machine; nothing was uploaded anywhere.

Executive summary

₹19.78L	₹15.93L	₹4.83L	+₹4.46L
Salary received	Total spent	On credit cards	Net change

Total spent excludes ₹551,286 of card-bill payments, which move between your own accounts and appear on both statements. Counting them would report the same card spending twice.

You managed a total inflow of ₹2,039,149 against total expenditures of ₹1,593,342, resulting in a net surplus of ₹445,807. Your primary bank account handled the bulk of this activity with ₹1,376,080 in outflows, while your UPI app recorded 414 transactions totaling ₹285,474 in spending.

You act as a primary clearinghouse for social expenses. While your individual spending is high, your UPI transactions reveal a pattern of settling group costs rather than just personal consumption. For instance, your transfers to Lionel Messi and Kylian Mbappe show nearly identical inflow and outflow amounts, suggesting you are frequently fronting the cost for others and being reimbursed later.

Your lifestyle is anchored by a heavy, invisible layer of fixed obligations. Beyond your visible shopping, a silent stream of recurring monthly outflows—including Home Services (₹7,004) and Electricity (₹2,405)—creates a baseline of commitment that exists regardless of your discretionary choices. These small, automated monthly hits aggregate to a significant annual commitment that a simple glance at your top payees would overlook.

What was analysed

Account	Period	Transactions	Mostly
Bank account	Aug 25 - Jul 26	85	loan repayment, rent, investments
Credit card	Aug 25 - Jul 26	304	shopping, transport, groceries
UPI app	Aug 25 - Jul 26	414	utilities, food, health

Bank account

85 transactions · ₹1,376,080 out · ₹1,977,946 in

Your total outflows for this period reached Rs 1,376,080, while your total inflows were significantly higher at Rs 1,977,946. The largest portion of your spending was dedicated to loan repayment, totaling Rs 551,286. You also allocated Rs 381,980 toward rent and Rs 300,364 to various investments.

Your recurring monthly obligations include Rs 2,405 for electricity and Rs 1,199 for broadband. Aside from these, you spent Rs 43,159 on utilities, including payments to the State Electricity Board. A notable amount of Rs 99,291 was withdrawn as cash. There is a significant portion of your spending that remains uncategorized.

Largest payees on this account

Payee	Total	Share
CREDIT CARD PAYMENT	₹551,286	40.1%
PEP GUARDIOLA	₹381,980	27.8%
EXAMPLE BROKING	₹300,364	21.8%
ATM WITHDRAWAL	₹99,291	7.2%
STATE ELECTRICITY BOARD	₹28,781	2.1%
EXAMPLE FIBERNET	₹14,379	1.0%

Credit card

304 transactions · ₹483,074 out · ₹0 in

Your total credit card expenditure for this period reached ₹483,074. Shopping emerged as your largest expense category, totaling ₹185,351. This was driven significantly by payments to Example Sports for ₹80,693 and Example Fashion for ₹53,040. You also spent ₹96,260 on transport, all of which was directed to Example Fuel.

Essential living costs remained substantial, with groceries amounting to ₹87,014. Your food expenses were much lower at ₹13,896. You also managed a loan repayment of ₹40,491. While your recurring subscriptions like gym and streaming fees are relatively small, your overall spending remains high without any recorded incoming funds to offset these costs.

Broadband	₹1,199	monthly	12×	Bank account
Example Streaming	₹650	monthly	12×	Credit card
Example Music	₹119	monthly	12×	Credit card

What your spending says about you

1. You act as a primary clearinghouse for social expenses. While your individual spending is high, your UPI transactions reveal a pattern of settling group costs rather than just personal consumption. For instance, your transfers to Lionel Messi and Kylian Mbappe show nearly identical inflow and outflow amounts, suggesting you are frequently fronting the cost for others and being reimbursed later.

2. Your lifestyle is anchored by a heavy, invisible layer of fixed obligations. Beyond your visible shopping, a silent stream of recurring monthly outflows—including Home Services (₹7,004) and Electricity (₹2,405)—creates a baseline of commitment that exists regardless of your discretionary choices. These small, automated monthly hits aggregate to a significant annual commitment that a simple glance at your top payees would overlook.

3. A significant portion of your 'spending' is actually debt management. The largest single payee in your records is 'CREDIT CARD PAYMENT' at ₹551,286, which represents a massive movement of capital that doesn't reflect new consumption. This suggests that a large part of your monthly cash flow is dedicated to reconciling past months rather than funding current lifestyle changes.

4. You have a high-frequency, low-value 'leakage' in cash withdrawals. While your top payees are dominated by large transfers like Example Broking (₹300,364), your ATM withdrawals total a substantial ₹99,291. This indicates a significant amount of untracked, untagged spending occurring in physical cash that bypasses your digital footprint entirely.
